

Manufacturers of Conveyor and Furnace Belting

CHS-ASIA . . . the leader in belt manufacturing, High Quality Belting, Competitive Pricing, and excellent lead times including our expediting service for downtime

Advantage

1. Since the surface is flat and smooth the belts can carry small items and unstable productions.
2. The belt strength against pressure is high, so belt can be used for processing under pressure.
3. The allowable tension is high, so that heavy load can be transported.

Material

SUS 304 (Low Temperature)

SUS 316 (Acid Resistance or Alkali Resistance)

SUS 310S (Heat Resistance)
